NOTES: Weathertight heaters are standard with a 4 foot oil and heat resistant power cord.

Class 1, Group D heaters are standard with 18" of lead wire for connection to the power leads in an approved splice box.

For Class 1, Group D thermostats, see page 26.

heater only

heater only

For Class 1, Group D thermostats, see page 26.

Heaters with Y-type harness and thermostat (see page 26 for drawings with dimensions)

Use a thermostat with all lube oil heaters to protect the oil from overheating if the heater is energized while the engine is hot or running.

Lube oil heaters must always be installed in the sump with the entire heater submerged below the oil level at all times.

120 Volt and 240 Volt are complete with a 3-prong plug.

Kim Hotstart Assembled Lube Oil Heaters eliminate the need for splice boxes or field wiring of the thermostat and heater.

Always mount the thermostat above and to one side of the heater for the most efficient control.

OIL HEATERS WITH THERMOSTATS

To specify temperature range of thermostat, insert numerical code from chart in place of the XX in model number.

Example:

Desired Temperature Range 100° - 120°

Catalog Number: Model OW2121XX-000

Order as: Model OW212110-000

NUMERICAL CODE	TEMPERATURE RANGE		SWITCH CAPACITY	THREAD SIZE
	On	Off		
06	60°F	80°F	120V - 15 Amps	1/2" N.P.T.
08	80°F	100°F	208V - 10 Amps	
10	100°F	120°F	240V - 10 Amps	
12	120°F	140°F	277V - 10 Amps	

DC Oil Heaters

12 and 24 volt

12 VOLT/24 VOLT DC CONTROL BOXES		
25 Amps Maximum	12V 24V	JBMC330DC-12V JBMC330DC-24V

When used with a thermostat control, all DC oil heaters must use a DC relay

Oil Capacity	Volts	Watts	Kim Hotstart Model Numbers			Amps	Watts Per Square Inch
			1/2" N.P.T. With a 4" Probe Length	3/4" N.P.T. With a 4 7/8" Probe Length	1" N.P.T. With a 5 3/8" Probe Length

5 to 15 Gallons	12 24	300 300	— —	— OW430900-024	OW630900-012 OW630900-024	25.0 12.5	3/4" are all 18 WSI 1" are all 13 WSI
15 to 30 Gallons	24	500	—	—	OW650900-024	20.8	26.0 WSI

NOTE: Kim Hotstart also has DC oil heaters available for hazardous locations. Change "OW" in model number to "OE".

Please see page 21 for photos and technical drawings of "OW" and "OE" style oil heaters.

12 Volt and 24 Volt DC oil heaters can be powered directly from the battery, but it will drain the battery very rapidly unless charged by an alternator or generator.

NOTE: Heater amperage as shown in the table above will determine the life of the battery — (Amps x Hours = Amp hours).

Example: A 12.5 Amp heater will completely drain a 100 Amp-hour battery in 8 hours.

$$\frac{100 \text{ Amp/hour}}{12.5 \text{ Amp}} = 8 \text{ Hours}$$

Temperature Controls

Weathertight

Weathertight models are furnished with a 3 ft. 16/3 HPN power cord. Class I, Group D model is furnished with 18" of lead wire for connection to the power leads in an approved splice box.

Class I, Group D Hazardous Location

Lube oil temperature controls hold lube oil at the desired temperature.

If the heater is energized while the engine is hot or running, Kim Hotstart recommends using thermostats with all lube oil heaters to protect the oil from overheating.

The sensing unit can be changed without draining the sump.

Weathertight Model Number	Class I, Group D Model Number	Temp. Range On Off	Thread Size	Switch Capacity
